### DIRECTIONS FOR USE

Mix according to the recommended dilution rates and apply as a spray or a drench to turf at times when root growth is required such as following seeding, turfing, or at the beginning of the growing season. Use a water volume of between 5-15L per 100m<sup>2</sup> apply in enough water to achieve adequate coverage of the application area depending on the application method (e.g. if using a watering can a higher water volume will be required compared to a pressure sprayer). Avoid application to hard surfaces such as concrete and stone as the product may stain. Do not use in spray equipment that has previously been used for herbicide application.
