> About

Lawnporn Insta-Green turf pigment is a turf colorant designed for application to sporting stadiums, greens and tees and the lawn of the home enthusiast. This pigment product enables turf managers to check for uniform application of chemicals, and provides the additional benefit of natural green colour lasting 1–2 weeks.

Insta-green is the new turf colourant that contains natural green pigments which lasts for weeks in periods of slow growth and does not appear artificial.

Insta-Green will create an instant healthy looking sward. When applied as per label instructions, the pigment coats the leaf tissue and changes turf colour from a light yellow to a dark green.

By applying Insta-Green in the autumn, winter and spring the reflectance of light decreases this helps increase the solar radiation around the grass plant, which provides a healthier plant by increasing the photosynthetic and metabolic rate in transitional and dormant periods. Insta-Green is resistant to adverse effects of prolonged UV light exposure.

> Mixing

Fill spray tank with half the required volume of water. Shake container of Lawnporn Insta-Green well and add required amount to spray tank while stirring. Add any tank mix plant protection products (e.g. herbicides) last.

> First Aid & Safety Directions

In case of contact with eyes or skin, flush at once with large amounts of water. If irritation persists, seek medical attention. If swallowed, drink large amounts of water and induce vomiting. Seek medical attention.
