HOW CERA TRAP FRUIT FLY ATTRACTANT REFILL WORKS

Cera Trap contains a unique protein based liquid solution that is very attractive to both female and male fruit flies. This product is specifically designed to refill CERA TRAP ORGANIC FRUIT FLY TRAP. The smell of the liquid will lure the fruit fly into the specially designed trap. Unable to escape they remain in the trap and drown in the liquid.

The organic liquid contains no pesticides and will continue to work even after many flies are drowned in the liquid. This refill bottle is designed to top up the trapping system while still secured in the tree to enable convenient handling and time saving for continuous control.

WORKS ON: Apples, Apricots, Cherries, Gapes, Grapefruit, Guava, Lemons, Limes, Mandarin, Mangoes, Oranges, Passionfruit, Pawpaw, Peaches, Pears, Plums, Nectarines.

TARGETS: Queensland and Mediterranean Fruit Flies. Works on the females and breaks the breeding cycle.

WHEN TO USE: It is important to control fruit fly numbers before they start attacking the fruit. Cera Trap Organic Fruit Fly Trap should be hung in trees when the fruit are small & still developing. Cera Trap Organic Fruit Fly Attractant Refill should be used in conjunction with Cera Trap Organic Fruit Fly Trap to top up or refill the trapping system when liquid levels begin to appear low throughout the fruiting season.

HOW TO USE: Shake bottle vigorously before use. You may notice a gelatinous layer at the bottom of the bottle. This is normal for the product and is part of the protein material. Remove lid from nozzle and cut top off nozzle at the indicated mark. Insert into the entry holes of the Cera Trap Organic Fruit Fly Trap and pour liquid directly into trapping system. **IMPORTANT:** Avoid spillage on outside of trap as this will attract fruit flies to this area and they may not enter the trap.

STORAGE AND DISPOSAL: Store in the closed original container in a well-ventilated area, building or room as cool as possible, away from children, animals or food. Prior to use DO NOT store for prolonged periods in direct sunlight. As contents are environmentally the container and contents can be disposed of by wrapping in paper, placing in a plastic bag and putting in garbage. The Cera Trap liquid attractant is suitable for composting.

SAFETY DIRECTIONS: Avoid contact with eyes and skin as this product may be an irritant. Flush affected area with water for 15 minutes. Should symptoms persist seek medical attention. Wash hands after use.

FIRST AID: If poisoning occurs contact a doctor or Poisons Information Centre. Phone (Australia) 13 11 26.

SAFETY DATA SHEET: Additional information is listed in the Safety Data Sheet, available from Amgrow Pty Ltd 1800 063 619.

NOTICE: This product is designed only for the particular purposes indicated on the label. Failure to use the product strictly as directed may be illegal, prove dangerous or render the product ineffective.
