

Amgrow organix® Harvest

- ✓ Organix Harvest is a totally natural liquid fertiliser prepared from ocean fish, Tasmanian seaweed and fulvic acid (fulvic acid is a natural component of humus that helps plants absorb nutrients).
- ✓ It provides natural plant nutrients, trace elements and seven growth stimulants.
- ✓ Contains a natural wetting agent.
- ✓ Harvest will increase growth, improve flowering and fruiting and will assist in creating healthy soil.
- ✓ Harvest is ideal for vegetables and herbs, fruit and flowers and general garden use.

Directions for Use: Shake well before use. Add required quantity to water and mix well. Measuring cap holds 48 mL.

Garden Beds: Mix 48 mL of Harvest Concentrate in a watering can. (9-10 litres). Apply 1 watering can per square metre of soil area. Apply before planting and then monthly throughout the growing season.

Pot Plants: Mix 48 mL of Harvest Concentrate in a watering can. (9-10 litres). Apply until liquid starts to drain from the bottom of the pot. Apply monthly during the growing season. Apply at half rate for sensitive species such as ferns and African violets.

Foliar Spray: Mix 5 mL (1 tsp) of Harvest Concentrate per litre of water. Apply as a fine spray to evenly cover all both the top and bottom of leaves.

Cytokinins 25mcg/litre
Tri-Indole acetic acid 150mcg/litre
Plus: Calcium, Magnesium, Sulfur,
Iron, Copper, Zinc.

Safety: Avoid contact with eyes.
If eye contact occurs flush eyes
under running water. If irritation
occurs seek medical advice.
