**100% BLENDED NON-IONIC  
SURFACTANT COMPOUNDS**

**MULTI-PURPOSE PROFESSIONAL GRADE  
SOIL WETTING AGENT**

**1 LITRE**

# MOIST

100% BLENDED NON-IONIC SURFACTANT COMPOUNDS  
A TRIPLE-ACTIVE SOIL WETTING AGENT

## DIRECTIONS FOR USE

Mix according to the recommended dilution rates and apply as a spray to turf prior to the onset of drought conditions. Lawnporn Moist is designed to assist in retaining moisture in the root zone, and assist in re-wetting hard to wet soils. Use a water volume of between 5-15L per 100m<sup>2</sup>, apply in enough water to achieve adequate coverage of the application area depending on the application method (e.g. if using a watering can a higher water volume will be required compared to a pressure sprayer). Irrigate or water lawn after application. Do not apply when temperature exceeds 32°C, and do not tank mix with fertiliser products.

### GUARANTEED MINIMUM ANALYSIS

Blended non-ionic surfactants - 100%

SITUATION	RATE	COMMENTS
Preventative application to turf lawns (before drought conditions)	100mL / 100m <sup>2</sup>	Apply with a hand sprayer in a minimum of 5L water per 100m <sup>2</sup> . Irrigate or water lawn after application. Repeat every 3-4 weeks during the growing season. Use the higher rate when drought conditions are more severe or when soil is hard to wet.
Curative application to turf lawns (after drought conditions)	200-300mL / 100m <sup>2</sup>	

## MIXING

Fill spray tank with half the required volume of water. Shake container of Lawnporn Moist and add required amount to spray tank while stirring. Avoid filling with high pressure as foaming may occur.

## STORAGE

Do not store below -5°C as crystallisation may occur.

## FIRST AID & SAFETY DIRECTIONS

In case of contact with eyes or skin, flush at once with large amounts of water. If irritation persists, seek medical attention. If swallowed, drink large amounts of water and induce vomiting. Seek medical attention.
